# Welcome

**Fidelis 100 is like a faith-based SmartBeta or Enhanced Index. It is set to become the standard for benchmarking diversified faith- and factor-based equity portfolios.**

After successfully managing a multi-cap, multi-factor faith-based separate account composite (GIPS® compliant) for over 10 years called WI Fidelis, Wallick Institutional launched the WI Fidelis Multi-Cap Multi-Factor Index March 17, 2022. This “Fidelis 100” Index integrates Inspire Investing’s revolutionary faith-based, biblically responsible social impact scores with a multi-factor methodology for equity selection. Multi-factor investing has been lauded by numerous academic and professional white papers<sup>1</sup>.

Inspire Investing, the world’s largest provider of biblically responsible ETFs, licensed the WI Fidelis Index with a mandate to replicate it for the Inspire Fidelis Multi-Factor ETF (FDLS) which began trading in August 2022 on the NYSE. Since then, the Inspire Fidelis ETF has been WI Fidelis composite’s only holding. With the advent of the FDLS ETF based on our investment methodology, maintaining a GIPS® compliant composite to track composite performance is no longer necessary. Therefore as of December 31, 2022, Wallick Investments discontinued its claim to GIPS® compliant investment performance for the WI Fidelis composite, now called the WI Fidelis Strategy. After 4Q2022, the performance for the WI Fidelis Strategy, is this historical separate account performance with a transition to the Inspire Fidelis Multi-Factor ETF performance thereafter. Historical GIPS® compliant performance of our WI Fidelis composite as a separate account will remain on our website by accessing the 3Q2022 and 4Q2022 Portfolio Reviews.

Inspire’s Fidelis ETF is a material equity holding for our clients and provides continuous access to our faith and factor WI Fidelis investment methodology worldwide— investments focused on faith and science,

**NOT market cap weights or unproven often emotion-driven active management.**

1 Corinthians 10:31 NABRE

# What is factor investing?

Factor investing is a quantitative, disciplined process for selecting stocks for inclusion in a portfolio based on pre-defined factors (virtues) that have shown evidence of adding excess risk-adjusted return.

2002 to 2016 return data based on FTSE Russell Methodology document. 2017 to 2023 return data based on Morningstar FTSE Russell indices. Information is believed to be reliable but is not guaranteed.

### Russell 1000 Factor Excess Returns 2002 to 2023

### % Frequency of Annual Excess Returns

# Why multi-factor investing?

## 1. Potential excess returns

2.41% average annualized excess return over market-cap weighted indices from 2002–2023 (see p.1).

## 2. Potential improved consistency

Outperformance 77% of calendar years 2002–2023 (see p.1).

## 3. Research lauding the benefits of multi-factor based investments - See [WIFidelisIndex.com/research](https://www.wifidelisindex.com/research)

## 4. Rise in popularity

We have identified 6 peer indices with what we consider a similar material allocation to small- and mid-cap companies.

- Hartford Multi-factor US Equity Index
- Russell 1000 Comprehensive Factor Index
- JPMorgan Diversified Return US Eq Index
- Morningstar US Market Factors Tilt Index
- MSCI Multifactor USA Index
- Wisdom Tree US Multifactor Index

According to Statista, of the over 350 institutions and advisors surveyed, 64% said they had more than 10% of their assets in factor-based ETFs— up from 51% in 2020.

According to ETFGI's Insights, assets in factor-based ETFs had risen to \$1.24 trillion in 2021 and have grown at an average compounded growth rate of over 30% over the previous 5 years.

## 5. Wallick Investments' experience

Our Fidelis separate account composite has consistently ranked highly against peers in the Morningstar separate account database, receiving a **4 or 5 Star Morningstar Overall Rating** 80% of reported periods and never less than 3 Stars. For details, visit our website: [WallickInvestments.com/morningstar](https://www.WallickInvestments.com/morningstar)

# Fidelis 100 Index Management

## Fidelis 100 Index Selection Process:

**Universe of stocks**  
(~9,100)

**Narrowed universe**  
(~800)

- Inspire Impact Scores 0 or higher
- \$250+ million market cap
- not bottom 20% V, G or M
- top 60% combined VGM

## Factor Inputs

- Momentum
- Quality
- Value

## Fidelis Scores

---

## Fidelis' 100 holdings

We start with the universe of securities listed on major US stock exchanges, approximately 9,100 but then we narrow the list to those that:

- have a positive Inspire Social Impact Score (faith-based screening: [Inspireinvesting.com/inside-the-inspire-impact-score](https://www.inspireinvesting.com/inside-the-inspire-impact-score))
- are not limited partnerships or state-owned
- have a market cap of +250M or more
- are not in the bottom 20% for Value, Growth or Momentum (VGM), and
- are in the top 60% for expected earnings surprise and for combined VGM

This leaves about 800 stocks.

From here, percentile scores for each stock are calculated for each sub-factor listed on the Factor Input Table (next page). The final Fidelis Score is the aggregate sum of each factor percentile score multiplied by its predetermined weight listed on the Input Table.

Momentum 33% (including EPS Strength)		Quality 34% (including Profitability, Financial Health and Growth)		Value 33% (including Volatility and Dividend Yield)	
12-Month Relative Strength (15%)	Current Year Revision Trend last 4 weeks (3%)	Inspire Social Impact Score (5%)	Current Ratio (2%)	Current Dividend Yield (8%)	Price to Book Value divided by Estimated 3-5 year Growth Rate (3%)
3-Month Relative Strength (6%)	Current Year Revision Trend last 12 weeks (2%)	Enterprise Value / EBITDA (3%)	Quick Ratio (2%)	Average Consensus Value vs. Price (5%)	Price to Cash Flow divided by Estimated 3-5 year Growth Rate (3%)
Latest Quarter Earnings Surprise (3%)	Expected Earnings Surprise (1%)	Return on Invested Capital (ROIC) (3%)	Sales Growth Year over Year (2%)	Price to Sales divided by Estimated 3-5 year Growth Rate (5%)	5 Year Beta (3%)
Last Quarter Earnings Surprise (3%)		Free Cash Flow / Market Cap % (3%)	Earnings Per Share (EPS) Growth Year over Year (2%)	Price to Earnings divided by Estimated 3-5 year Growth Rate (3%)	2 Year Beta (3%)
		Return on Assets (ROA) (2%)	Net Income Growth 1 year (1%)		
		Return on Equity (ROE) (2%)	Sales Growth 1 year (1%)		
		Profit margin (2%)	EPS Growth last 5 years (1%)		
		Debt to Equity (D/E) (2%)	P/B Growth last 5 years (1%)

## Factor Input Table

From the stocks within the top 20% for market capitalization, 40 stocks with the highest Fidelis Scores are chosen, subject to sector and industry constraints (below).

Sector	# of Stocks	Minimum # of Industries
Basic materials	4	2
Business services	4	2
Technology and communications	27	7
Consumer discretionary (including autos and transportation)	6	3
Consumer staples	4	2
Energy	8	3
Financial (including real estate)	16	6
Medical	12	4
Industrial (including aerospace, conglomerates and construction)	11	6
Retail	5	3
Utilities	3	2
<b>11-18 Sectors</b>	<b>100 Stocks</b>	<b>40 or more Industries</b>

Finally, the next 60 stocks, regardless of market cap, with the highest Fidelis Score (p. 3) subject to the industry and sector constraints (above) are then added to complete the list of constituent stocks.

**The WI Fidelis Index is rebalanced and reconstituted quarterly, which means the holdings are reset every quarter to what we believe is the best combination of 100 faith-based multi-factor securities.**

For detailed information on our investment methodology, see our methodology guidelines at Solactive.com. Please note: Although the factors and weightings are similar, there is not a one-to-one correlation between our WI Fidelis Strategy and our WI Fidelis Index. Investors cannot be guaranteed the same performance.

# Why Fidelis 100 multi-cap Index?

1. High expectations for consistent robust multi-factor performance results
2. Holdings limited to those with positive Inspire Insight Scores
3. Fidelis 100 provides enhanced multi-dimensional diversification
  - **31 sub-factors, 11-18 sectors and over 40 industries**
  - **Momentum factor integrates both relative strength and earnings momentum**
  - **Quality factor integrates Inspire’s Best in Class ratings**
  - **Value factor integrates dividend yield and beta (low vol)**
  - **ADR inclusion with a 35% maximum allocation**
  - **Equal weighting methodology ensures a high conviction for all holdings**
4. Wallick Investments’ Fidelis Strategy experience: for WI Fidelis Strategy performance, visit [WallickInvestments.com/performance](http://WallickInvestments.com/performance) or see data beginning on p. 9.

## Peer Comparisons

Data is obtained from online investment methodology documents provided by the Index provider or product sponsor. It is believed to be reliable, but reliability cannot be guaranteed. The weightings for each component of Value, Quality and Momentum for the WI Fidelis Index are available through our methodology document at <https://www.solactive.com/indices/?index=DE000SLOFE03#documents>

<sup>2</sup>Average holding conviction relative to a top 10 holding expressed as a percentage— Step 1. single security weighting if portfolio were evenly weighted, calculated: 100% / number of holdings. Step 2. average weight of a top ten holding calculated: actual combined percentage weighting of top 10 holdings / 10. Step 3. Step 1 / Step 2.

Example S&P 500:

1. 100% / 500 holdings = .002
2. 30% (total % in top 10 holdings) / 10 = .03
3. .002/.03=.0667 or 7%

# WI Fidelis Strategy Fact Sheet

<b>Asset Class &amp; Objective</b>	<p>WI Fidelis' overall portfolio style is best defined as Multi-Cap Blend with a concentration on capital appreciation and income. WI Fidelis' goal is to outperform its benchmark in all market environments. WI Fidelis portfolio is a core, "all-weather" strategic holding consisting of the Inspire Fidelis Multi-factor ETF (NYSE: FDLS) which holds 80-100 stocks, providing multi-dimensional diversification, including high exposure to the style factors Quality, Value and Momentum, all of which have shown a tendency to outperform the overall market in the long run. The actual weightings at ETF launch were 34% Quality, 33% Value and 33% Momentum. Holdings are rebalanced and reconstituted quarterly. For more information, visit WIFidelisIndex.com. Prior to ETF launch, the WI Fidelis strategy was managed through GIPS® compliant composite of SMAs.</p>

# WI Fidelis Strategy Ratio Grid

Below are some of the most popular ratios used in portfolio analysis—WI Fidelis Strategy’s ratio score and how our strategy would rank (percentiles) by category and overall against other ETFs and Mutual Funds. The lower the percentile the better.

For example, WI Fidelis’ 10yr **0.70** Sharpe ratio ranks in the **96<sup>th</sup>** percentile among Mid-Cap Core ETFs (our assigned Morningstar<sup>®</sup> category) and **99<sup>th</sup>** percentile against Mid-Cap Core Mutual Funds.

This means our risk-adjusted performance is **better than 96% of all ETF managers** and **99% of mutual fund managers** in this category. The “weights” below each category indicate what percentage of the WI Fidelis Strategy fell within that category during the majority of the last quarter.

## Definitions

### ■ Sharpe

The Sharpe Ratio is a risk-adjusted measure of performance. It is calculated by using excess return over a risk-free rate divided by the standard deviation (total risk) to determine reward per unit of risk.

### ■ Sortino

The Sortino Ratio is also a risk-adjusted measure of performance. It is calculated by using excess return over a risk-free rate divided by the standard deviation (total risk) of negative returns.

### ■ Alpha

The Alpha Ratio is a measure of the difference between a portfolio's actual returns and its expected performance, given its level of risk as measured by beta (market risk). A positive alpha figure indicates the portfolio has performed better than its beta would predict. In contrast, a negative alpha indicates the portfolio has underperformed, given the expectations established by beta.

### ■ Treynor

The Treynor Ratio is a measure of efficiency utilizing the relationship between annualized risk-adjusted return and risk. The Treynor Ratio utilizes beta instead of the standard deviation.

### ■ Information

The Information Ratio is a measure of portfolio returns in excess of the returns of a benchmark (usually an index) to the volatility of those returns. The information ratio measures a portfolio manager's ability to generate excess returns relative to a benchmark, but also attempts to identify the consistency of the portfolio manager. A higher information ratio indicates better consistency.

### ■ Upside

Upside Capture Ratio measures a manager's performance relative to its primary benchmark in up markets. For example, if the ratio is 110%, the manager has captured 110% of the up-market and therefore outperformed the market on the upside.

### ■ Downside

Downside Capture Ratio measures manager's performance relative to its primary benchmark in down markets. For example, if the ratio is 110%, the manager has captured 110% of the down-market and therefore underperformed the market on the downside.

### ■ Batting Average

The Batting Average is the percentage of months in which a portfolio outperforms or matches its benchmark.
