STRATEGIC ■ MORAL ■ RIA

First Quarter 2025 Review & Commentary

The first quarter of 2025 did not turn out the way most investors thought it would. President Trump's trade wars and significant breaks with the longstanding geopolitical order turned recent market trends upside-down. A previously solid outlook for the US economy has been hit by a high degree of uncertainty. After two years of blockbuster returns for stocks, the first quarter of 2025 was a rude awakening. The result was a sharp turn lower for stocks, with the Russell 3000 Stock index declining -4.76% for the quarter and actually suffering a -10% correction from its February's peak.

There were havens for investors with diversified portfolios. After lagging the US in recent years, international stocks rose 6.20% as measured by the MSCI All Country World Index Ex US. Taxable bonds also posted gains, fulfilling their traditional role as a counterweight to stocks as investors sought the safety of fixed income; however, municipal bonds declined slightly due to technical supply and demand issues. With tariffs looming and global trade uncertainty growing, the price of gold surged 19%. Crude oil prices fell, however, as the threat of tariffs dampened global demand and major oil producing countries agreed to increase production.

In our view, the biggest takeaway from the first quarter is: diversification works. For all the turmoil, investors who stayed with the tried-and-true strategy of holding a diversified portfolio came out of 1Q2025 relatively unscathed.

On Wednesday, April 2, after the market close, President Trump held his “Liberation Day” announcement regarding tariffs. It was not well received by investors, business leaders, or consumers. The pronounced tariffs were much larger than expected and their future implementation was left uncertain by leaving the door open to tariff rates being reduced or increased in the future. The next day, the stock market dropped the most in a single day in nearly five years when the world was in a global shutdown because of Covid. Stocks continued to drop over succeeding days and officially crossed over into bear market territory. The bond market and the US dollar were also under duress.

One week after “Liberation Day,” at mid-day April 9, the President announced a 90-day pause on his reciprocal, punitive tariff threats against all nations except China. The Dow, which had been down -700 points, rallied immediately and ended the day up +2700, a 3400-point swing! The President referred to how “yippy” and “queasy” people had become as his reason to change course.

The Trump administration knows that uncertainty is creating negative pressure on the economy and the markets. They seem to believe tariff issues can be resolved in 3–6 months, removing the uncertainty plaguing the system. Meanwhile, the President appears willing to suffer market turmoil and economic uncertainty if need be in order to restructure the global trading system.

However, there remains a lot of uncertainty. Volatility will continue for the immediate future. Times like these are emotionally challenging yet, historically, these periods make money in the end for patient, disciplined, appropriately-positioned investors. As David Bahnson of The Bahnson Group puts it:

“Volatility around just one headline that can move markets up or down 5%+ in a single day is unnerving. The natural reaction is to react, to sell, and to attempt to avoid and protect from further decline. Any investor who is worth his/her salt knows that short-term timing the market is a fool’s errand, but the chart below reiterates why. Of the 50 best days in the market over the past 30 years, 50% of them occurred during a bear market ... If one were to have missed just 10 of those days, returns declined by a stunning 54%! Missing the top 20 cost investors losing 73% of their return and missing the top 30 days led to returns 83% lower than long-term averages. Higher long-term returns can only be achieved with both good AND bad markets – you can’t have one without the other. My point in including this isn’t to say that portfolios shouldn’t be actively managed; they should. It’s just a simple reminder that it’s not about ‘Timing the Market’ but ‘Time in the Market’. For those that commit to a plan, less anxiety awaits, and goals planned for get achieved.”

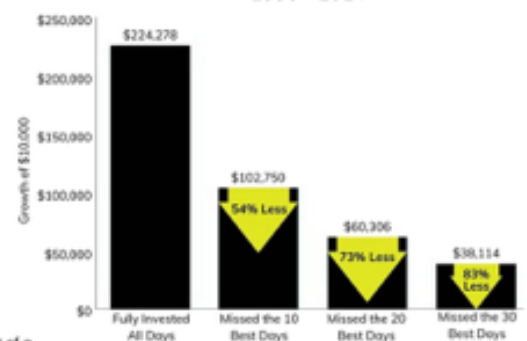

Time in the Market vs. Timing the Market

Better days are ahead, but it will be a bumpy ride between then and now. We at Wallick Investments are doing all we can to get our clients through. We thank you for the trust and confidence you have placed in us. Do not hesitate to call with your questions or whenever we may be of service. 📞

Investment portfolios, benchmarks & disclosures

WI FIDELIS STRATEGY (WIF) is a Multi-Cap Blend portfolio with a concentration on capital appreciation and income. WI Fidelis is a core, “all-weather” portfolio consisting of stocks with high exposure to the style factors Quality, Value and Momentum which all have shown a tendency to outperform the overall market. As of August 24, 2022, Inspire Fidelis Multi-factor ETF, based on Wallick Investments’ Fidelis Multi-Cap Multi-Factor Index methodology, became the only holding for the WI Fidelis Composite, now called “WI Fidelis Strategy.” All WIF holdings pass WI ethical screens.^Δ

Inception: January 2012

CUSTOM CORE BENCHMARK prior to 1/1/2019: 50% Vanguard 500 Index Fund (VFIAX) / 10% Vanguard Mid-Cap Index (VIMAX) / 30% Vanguard Small-Cap Index (VSMAX) / 10% Vanguard FSTE All-World ex-US Index (VFWIX)

* **CUSTOM CORE BENCHMARK (CCBMF) / MARKET CAP WEIGHTED TRADITIONAL INDICES BENCHMARK since 1/1/2019:**

48% Vanguard 500 Index Fund (VFIAX) / 22% Russell 1000 Value Index (IWD) / 15% Vanguard Small-Cap Index (VSMAX) / 10% Vanguard FSTE All-World ex-US Index (VFWIX) / 5% Vanguard Mid-Cap Index (VIMAX)

COMPOSITE INDEX: Russell 3000 / iShares Russell 3000 ETF (IWW)

* **WEIGHTED MORNINGSTAR® STYLE BENCHMARK:** The sum of each Morningstar Style category, multiplied by the actual WI Fidelis Strategy allocation to that style.

* **EVENLY-WEIGHTED FACTOR BENCHMARK:** 20% iShares Edge MSCI Min Vol (USMV) / 20% iShares Edge MSCI USA Momentum (MTUM) / 20% iShares Edge MSCI USA Quality (QUAL) / 20% iShares Edge MSCI USA Value (VLUE) / 20% SPDR® S&P Dividend ETF (SDY)

Please note: As of 3Q2022 Portfolio Review edition, page 4, line 5 is *EVENLY-WEIGHTED FACTOR BENCHMARK* data. Prior to 3Q2022, page 4, line 5 data was our proprietary *WEIGHTED FACTOR BENCHMARK*. 3Q2022 Portfolio Edition page 4, line 5 is *EVENLY-WEIGHTED FACTOR BENCHMARK* data, though “EVENLY” was omitted in error.

WI EXCELSIS MODEL (WIE) is best defined as Large-Cap Blend portfolio consisting of stocks with high exposure to the same factors as WI Fidelis Strategy. Unlike WI Fidelis, WI Excelsis will make tactical adjustments for portfolio exposure to: market volatility, equity style categories, sectors and industries as well as equity factors. All WIE holdings pass WI ethical screens.^Δ

Inception: July 2016

* **CUSTOM CORE BENCHMARK (CCBME):** 48% Vanguard 500 Index Fund (VFIAX) / 22% Russell 1000 Value Index (IWD) / 15% Vanguard Small-Cap Index (VSMAX) / 10% Vanguard FSTE All-World ex-US Index (VFWIX) / 5% Vanguard Mid-Cap Index (VIMAX)

MODEL INDEX: S&P 500 / Vanguard 500 Index Fund (VFIAX)

WI TACTICAL ASSET ALLOCATION MODEL (WITAA) is a tactical portfolio best described as a dynamic holding consisting of securities representing high-level assets best suited for the current business cycle based on macro-economic data. Holdings may include managed futures, which can be leveraged and long or short equities, fixed-income, currencies, or commodities. All holdings pass WI ethical screens.^Δ

Inception: June 2019

CUSTOM BENCHMARK: 62.5% Barclays iPath DJ UBS Commodities ETF (DJP) / 37.5% SPDR Barclays 1–3 month T-Bill ETF (BIL)

WI BOND COMPOSITE (WIB) is best defined as a fixed income portfolio consisting of primarily government bonds (traditional, inflation-protected and international) and corporates (both US and international). The durations, average credit quality and actual allocations are managed based on interest rate expectations with market and economic indicators.

Inception: April 2008

^Δ As of March 31, 2021, WI eliminates from consideration all companies with a negative Inspire Social Impact Score. Visit inspireinsight.com for more information.

Disclosures

1. At Wallick Investments, at least 70% of our asset allocation and equity (stock) factor exposure decisions are made strategically, i.e., for the long-term. The other 30% of our asset allocation decisions are tactical and made based upon our top-down economic data and systematic asset allocation trend data.
2. Our clients' strategic asset allocations are based upon an individual client's risk tolerance and time horizon.
3. Our security-selection decisions are made based on non-emotional, bottom-up factor-based processes that have shown to out-perform the overall market on a risk-adjustment basis over the long-term.
4. Wallick Investments, LLC is a fee only South Carolina Registered Investment Advisory firm founded in June 2005 and began claiming GIPS® compliance in July 2012 for performance starting in April 2008 and ending December 2022. Our Managing Partner, Daniel Wallick, was responsible for GIPS® compliance and will continue to review all marketing pieces before they are published.
5. Our strategic factor exposure is based on equal weightings of each factor—Value, Quality and Momentum.
6. The Fidelis Strategy was a composite until August 23, 2022, when Inspire Fidelis Multi-Factor ETF, NYSE ticker: FDLS, was launched and became the sole equity holding for WI Fidelis Strategy. Inspire Investing launched FDLS ETF with a mandate to replicate our WI Fidelis Multi-cap Multi-factor Index.
7. Wallick Investments utilizes FDLS ETF as a core equity holding for most client accounts.
8. Prior to creating composites in April 2008, Wallick Investments used models to manage client accounts. Due to timing of portfolio changes, there may have been variations between clients' performance and model performance. Historical model performance does not represent actual client performance. Composite performance does represent actual performance of client accounts.
9. Wallick Investments has created custom benchmarks for each investment strategy. The custom benchmarks are intended to closely resemble the actual composite and/or model components.
10. Securities within portfolios are priced at least monthly and when significant cash flows occur. Prices are obtained from our custodians Goldman Sachs and Charles Schwab. Prior to January 2023, Axys® was used to calculate a gross asset-weighted composite return using beginning-of-period values on an adjusted capital basis.
11. Results are presented gross of fees. Actual net returns may vary based on custodial fees, as well as, negotiated investment management fees. All graphs are presented gross of fees.
12. Management fees are accounted for on a quarterly, cash basis on the 1st month of the quarter and are billed in advance.
13. Wallick Investments' standard advisory fees are listed in our "ADV Brochure," "Investment Management Overview" and in our "Client Agreements." These documents are available upon request and/or at WallickInvestments.com.
14. Valuations and returns are computed and expressed in US dollars.
15. Unless otherwise noted in this presentation, all performance for periods greater than 1 year are annualized.
16. Past performance is no guarantee of future results and the possibility of loss exists.
17. Data is believed to be reliable and accurate, however, neither Wallick Investments nor our data providers will be held liable for errors. Due to rounding, differing calculation methods, differing data download dates, input error, etc., data may vary from quarter to quarter. Material data variances discovered will be notated and updated with a delta/change superscript (Δ) on the page where the correction is required. Wallick Investments' composites include a mandate to comply with the USCCB Investment Guidelines. This mandate is not included in benchmarks.
18. Performance data is obtained from Morningstar® and Goldman Sachs, Inc.

Strategic Asset Allocation Performance

Performance data is obtained from Morningstar®. It does not represent an actual account or a composite of accounts. It is the hypothetical return of an account if it owned the listed securities at the exact same weightings and rebalanced annually. Unless otherwise noted in this presentation, all performance for periods greater than 1 year are annualized.

Wallick Investments’ Composite & Model performance conclusions:

In 1Q2025, US markets significantly underperformed international markets. Value outperformed Growth and Large-Cap style categories were mixed. The Value factor was the strongest equity factor, and Quality was the weakest factor. Fidelis had mixed results against its benchmarks and peers over the last quarter, but has generally outperformed over the long-term.

Investing themes come in and out of favor, but over the long term, the factors Quality, Value and Momentum stand out. We continue to have the utmost confidence in our investment processes and believe these factors reward patient investors. Our conviction is supported by an abundance of academic research, historical performance, and a rush to create new “factor-based” ETF products.

Wallick Investments’ Strategic Moral Investing Commentary

Wallick Investments’ stock-selection processes integrate faith-based values and investment science. The biggest concern with such a strategy is what might be given up in investment performance; most studies suggest very little. To evaluate the cost or benefit of our faith-based screening, we monitor two benchmarks: the S&P 500 Catholic Values Index (CATH), which utilizes only a moral negative screening strategy of the S&P 500; and the Inspire 100 ETF (BIBL), a portfolio of 100 companies from the S&P 500 which have the highest Inspire Impact scores (a combination of negative moral and positive faith-based social impact screening). The results below show how the S&P 500 Catholic Values Index (CATH) and the Inspire 100 ETF (BIBL) have performed relative to the iShares Core S&P 500.

	3 mo.	1-yr.	3-yr.	5-yr.
S&P 500 Catholic Values ETF (CATH) vs. iShares Core S&P 500 ETF (IVV)	-0.41	-1.17	-1.17	-0.96
Inspire 100 ETF (BIBL) vs. iShares Core S&P 500 ETF (IVV)	3.29	-8.04	-5.86	-4.63

Performance data as of 3/31/2025

Wallick Investments’ Strategic Moral Investing conclusion:

Faith-based investments’ ability to outperform their benchmarks, and the performance deviation for screened vs. non-screened benchmarks (see above) is due primarily to a smaller allocation to Large-Cap companies. Wallick Investments’ position on strategic moral investing is that sound investment processes tapping a smaller, yet still diverse pool of companies striving to be forces for true good, should not compromise performance materially over the average investment cycle (approximately 7 years). However, with a significantly smaller Large-Cap universe from which to select securities, a Large-Cap faith-based approach may trail Large-Cap indexes over prolonged periods.

Key data points for Tactical Allocation adjustments

Although a smaller percentage of our decisions are tactical, we believe it is important enough to share our views. Unless otherwise noted in this presentation, all performance for periods greater than 1 year are annualized. Composite performance is the actual average asset-weighted return of all accounts managed according to a set strategy. Model performance is the performance of a hypothetical account. It does not represent performance of an actual account or account(s). Although Goldman Sachs, Inc. client accounts may be subscribed to managed models, actual performance will vary due to timing of portfolio changes and tax considerations.

What does the data that we monitor regularly, and which we believe to be most important in foreseeing economic conditions, currently say?

- The Conference Board Leading Economic Index (LEI) declined by 0.7% in March 2025 and fell by 1.2% over the past 6 months. The six-month reading indicates economic contraction.

- The Chicago Fed National Activity Index (CFNAI) was -0.03 for March 2025 and -0.01 for the three month moving average, indicating average economic activity.

The contribution of each of the major index categories were as follows:

-0.09	Production
-0.01	Employment contributed
0.11	Personal consumption contributed
-0.03	Sales, Orders and Inventories contributed

- The week ending April 18, 2025, the National Financial Conditions Index (NFCI) was -0.43. Negative values indicate looser credit conditions—a hallmark of more buoyant financial conditions.

Wallick Investments Tactical adjustments as of 3/31/2025:

Asset Class	% Adjustment to Strategic Allocation
Stocks/Equities	-5
Bonds/Fixed Income	-7
Other (long/short equities, fixed income, commodities, currencies)	+12

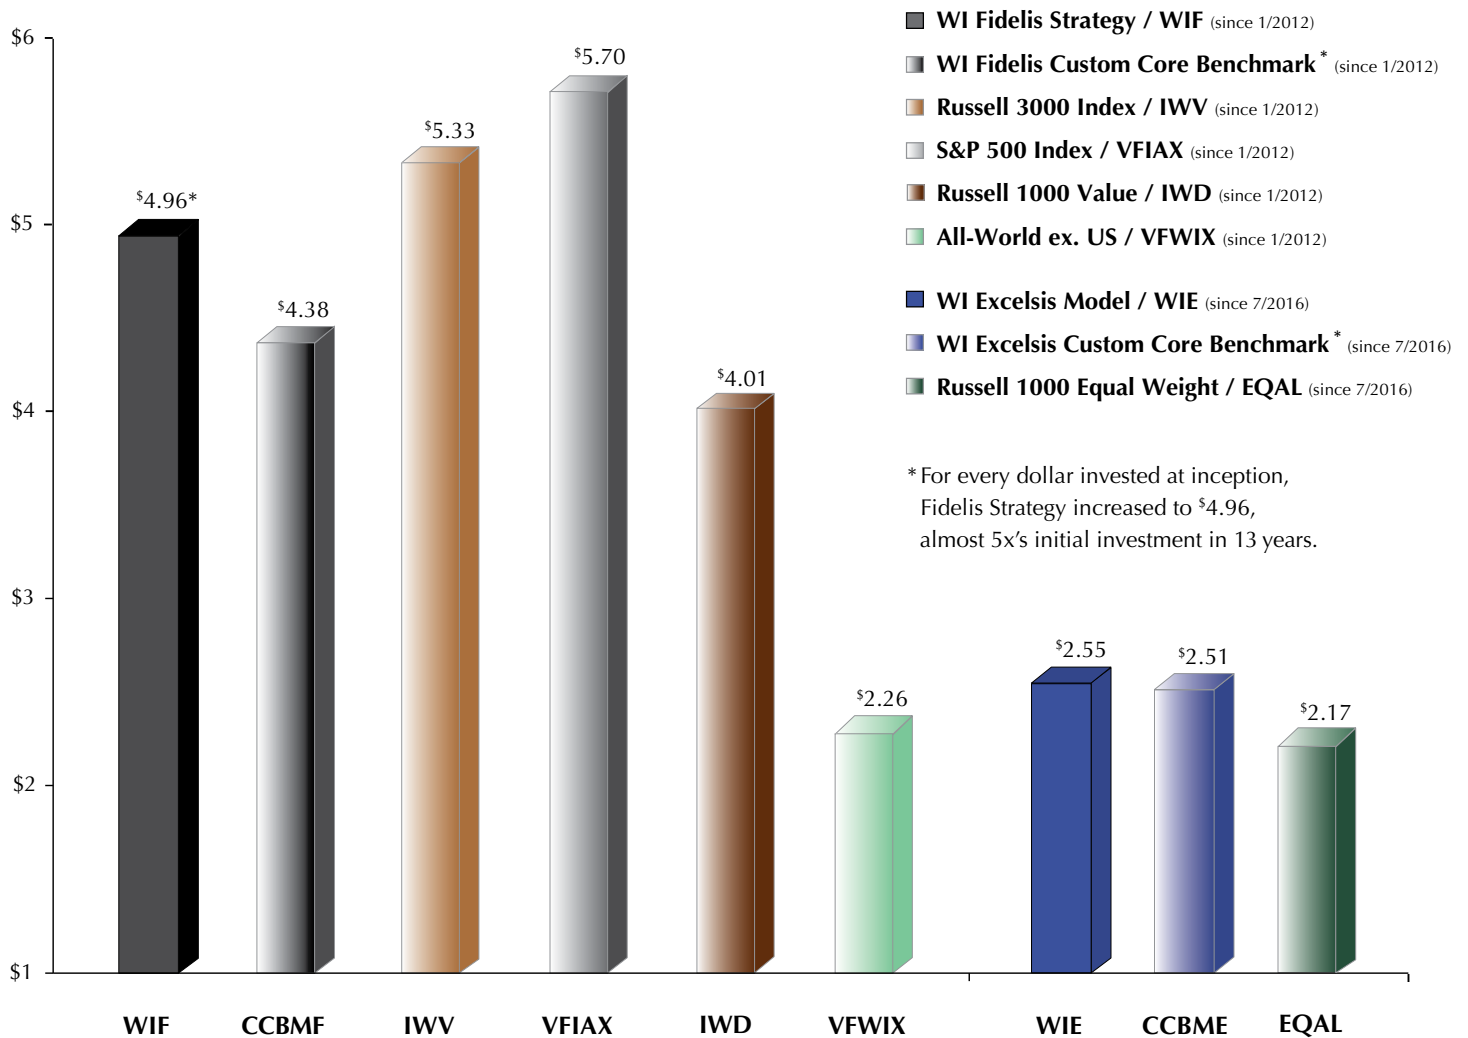

WI Tactical Asset Allocation Comparative Performance	1Q2025	1-yr.	3-yr.	5-yr.
WI Tactical Asset Allocation Model (inception 6/1/2019)	2.72	5.39	0.39	5.85
<i>Custom Benchmark</i> (p. 2)	6.71	10.34	0.79	11.88

Portfolio Performance	1Q2025	1-yr.	3-yr.	5-yr.	10-yr.
WI Bond Composite (inception 4/1/2008)	1.65	4.45	0.77	-0.31	0.89
<i>iShares Core US Aggregate Bond ETF (AGG)</i>	2.40	4.51	0.42	-0.48	1.38
<i>iShares Core International Aggregate Bond ETF (IAGG)</i>	0.14	4.34	1.92	0.73	2.18
<i>iShares JP Morgan USD Emerg. Mkts. Bond ETF (EMB)</i>	2.67	6.70	2.61	3.41	2.65
<i>iShares Barclays 1-3yr Treasury Bond ETF (SHY)</i>	1.56	5.25	2.73	1.03	1.36

Comparative Performance

Growth of \$1

WI Fidelis Strategy and Excelsis Model portfolios are developed and managed by Wallick Investments, LLC.

WI Fidelis Strategy performance is WI Fidelis GIPS compliant separate account performance through 3Q2022 with a transition to the Inspire Fidelis Multi-factor ETF performance thereafter**.

Model performance is performance of a hypothetical account. It does not represent performance of an actual account or account(s).

Although Goldman Sachs/FOLIO^{fn} Investments client accounts may be subscribed to managed models, actual performance will vary due to timing and tax issues. Each client's portfolio holdings and weightings vary based on individual time frames and risk tolerance.

The portfolio strategies and models display performance data to illustrate past performance and do not guarantee future results.

Performance as of March 31, 2025

*See page 2 for benchmark compositions.

**See page 1, "WI Fidelis Index Inspires ETF".

Fidelis 100

WI Fidelis Index Inspires ETF*

After successfully managing a multi-cap, multi-factor faith-based separate account composite for over 10 years, Wallick Institutional launched the WI Fidelis Multi-Cap Multi-Factor Index March 17, 2022. Integrating Inspire Investing's revolutionary faith-based impact scores with a multi-factor-based methodology for equity selection, this Index provides investors with a benchmark meeting certified Biblically Responsible Investing (BRI) standards that also incorporates factor-based equity selection, which is a selection strategy lauded by numerous professional white papers¹.

August 23, 2022 Inspire Investing, the world's largest provider of biblically responsible ETFs, licensed the WI Fidelis Index, with a mandate to replicate it, for the Inspire Fidelis Multi-Factor ETF (FDLS) now trading on the New York Stock Exchange.

Since August of 2022, the FDLS ETF has been WI Fidelis composite's only holding. With the advent of the FDLS ETF based on our investment methodology, maintaining a GIPS® compliant composite to track composite performance is no longer necessary. Therefore after December 31, 2022, Wallick Investments will be dropping our claim to GIPS compliant investment performance. Historical performance of our WI Fidelis separate account will remain on our website by accessing the 3Q2022 Portfolio Review. Going forward, "WI Fidelis Strategy" performance is this historical separate account performance through August 2022 with a transition to the Inspire Fidelis Multi-Factor ETF performance.

The Inspire Fidelis ETF is an exciting development for our clients and provides national access to our Fidelis investment strategy. If you have questions, please reach out to us: 803.699.9400 or info@wallickinvestments.com.
